SAL-5HP-UG124 & SHR-12U-S

Refer carefully to the manual before operation.

SAL-UG122/UG124 Series

Coding Principle

SAL - xxHP - UG122/124 - D -xx

Features

- LED touch panel for simple operation
- One main vacuum unit for 2 or 4 hopper receivers, suitable for height or long-distance conveying.
- Two-stage cyclone and filter technology with large dust bin for quick and easy maintenance.
- Standard vacuum breaking valve for quick material discharge, maximize load, and energy consumption.
- 5HP and above models are equipped with auto spraying device to reduce the cleaning frequency
- Standard 485 interface for remote monitoring to realize auto production

Vacuum breaking valve

Application

Collocated with two or four European vacuum hopper receivers SHR-U-S, it is suitable for conveying plastic materials of several dehumidifying dryers (such as two-in-one SDD). Besides, the machine also can achieve "One-to-Two" or "One-to-Four" material conveying to different injection moulding machines or hoppers, thus greatly saving the costs.
